

DAVID RAJ RAMAKRISHNAN

Immersive Developer | AR/VR/MR Application Specialist | Unity3D Developer

itsmedavidraj@gmail.com | 9092348258 | Bengaluru, India | linkedin.com/in/david-raj-ramakrishnan-47001696/

SUMMARY

Experienced Immersive Developer with 7+ years of expertise in designing and delivering interactive digital experiences across Virtual Reality (VR), Augmented Reality (AR), Mixed Reality (MR), WebGL, 2D, and 3D platforms. Certified Unity Developer skilled in the full software development lifecycle, from ideation and prototyping to deployment across Android, iOS, Windows, and WebGL environments. Proficient in Unity3D, C#, Git, Azure Cloud Services, and OpenAI integration concepts, with exposure to Unreal Engine using Blueprint. Strong background in 3D optimization, networking, cloud-integrated workflows, custom editor tools, analytics integration, and scalable retail visualization systems. Experienced in leading cross-functional teams, maintaining clean and scalable architecture, and driving Agile-based project delivery. Passionate about adapting to the evolving AI landscape and exploring Generative AI, Agentic AI concepts, and intelligent automation to create next-generation immersive and interactive user experiences.

EXPERIENCE

Immersive Developer – Senior Consultant, Capgemini	06/2023 – Present Bangalore
- Acting as the aspiring Architect and Technical Lead for SpeedShelf Lite, driving scalable system design, technical decision-making, and cloud-enabled retail visualization solutions. - Designed an AI-powered “Shelf Intelligence” solution integrating OpenAI APIs to generate automated retail insights, planogram intelligence, and intelligent shelf feedback workflows. - Built and locally validated Generative AI and Agentic AI concepts for SpeedShelf Lite using PSA (Planogram Space Automation) data to support automated merchandising recommendations, shelf analytics, and future-ready retail intelligence solutions. - Leading the development of immersive applications for VR, AR, MR, and WebGL platforms while ensuring alignment with business and client requirements. - Designing and implementing interactive 3D visualization features, retail shelf simulations, and analytics-driven user experiences for enterprise applications. - Managing Git repositories, maintaining scalable architecture, optimizing code quality, and following best engineering practices for efficient project delivery. - Collaborating with cross-functional teams to prototype workflows, enhance user interactions, and deliver feature improvements using Agile methodologies and sprint planning. - Testing and optimizing application performance, 2D/3D assets, and platform stability across Oculus Quest, Android, iOS, Windows, and WebGL environments.	
Game Engineer – 2, Osmo (Byju's)	10/2020 – 04/2023 Bangalore, India
- Developed and enhanced educational games for iOS and Android platforms, ensuring engaging and interactive experiences. - Implemented parent feedback features and child activity tracking to improve user engagement and learning outcomes. - Managed Git repositories for multiple games, maintaining clean, organized, and version-controlled code. - Created universal settings screens to simplify configuration across all games, reducing repetitive development tasks. - Collaborated with cross-functional teams using Jira, Miro, Box, and Slack for smooth project workflows. - Optimized animations, UI elements, and game assets to ensure consistent performance on multiple devices. - Monitored and resolved bugs and issues, maintaining high-quality standards and delivering games on schedule.	
Jr. Software Engineer, Tech Mahindra	08/2016 – 10/2020 Bangalore, India
- Developed VR and AR solutions to replicate Network Operations Centers and enterprise applications for telecom clients. - Created and rigged 3D models, screens, and interactive systems, integrating multiple animations and live feeds. - Maintained repositories, codebase, and documentation, ensuring high-quality and organized project artifacts.	

- Implemented AR Tower Finder to assist engineers in locating nearby towers with 3D models and navigation arrows.
- Collaborated with R&D and project teams to design interactive simulations and immersive experiences.
- Tested and optimized VR/AR applications, ensuring performance, usability, and cross-platform compatibility.
- Showcased multiple VR/AR proof-of-concepts to senior executives, gathering feedback to enhance user experience and functionality.

EDUCATION

Executive MBA, Dayananda Sagar University	2025 – 2027
Bachelor of Computer Applications (BCA), Don Bosco College of Arts & Science, Periyar University	07/2013 – 05/2016

SKILLS

Immersive Technologies • Virtual Reality (VR) • Augmented Reality (AR) • Mixed Reality (MR)	Game & Application Development • Unity3D • Unreal Engine • C# • Blueprint • 3D Optimization	Tools & Platforms • Git • Oculus Rift • HTC Vive • ARCore • Photon Multiplayer	Project Management & Methodologies • Agile & Sprint Methodology • Jira • Miro • ZenDesk
---	---	--	---

CERTIFICATIONS

Unity Certified Developer
Unity Technologies

ACHIEVEMENTS

- General Achievements, Professional
- Showcased 20+ VR/AR POCs to senior executives.
 - Awarded Customer Delight (Jan 2025 – June 2025).
 - Recognized twice by Tech Mahindra (Mar 2018 – Sep 2018).

ADDITIONAL SKILLS

- Technical Proficiency
- Unreal Engine
 - Figma
 - WebGL
 - OpenAI Integration
 - Generative AI
 - Agentic AI Concepts
 - Azure Cloud
 - REST APIs
 - Retail Shelf Intelligence
 - Planogram Visualization
 - System Architecture
 - Performance Optimization
 - GitHub
 - Analytics Integration
 - Technical Leadership

DECLARATION

Declaration of Truth

I hereby declare that all the details provided above are true to the best of my knowledge.
